DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-12, 14-18, 21-22, 25, and 26 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nesbitt (4,431,193). Nesbitt discloses a golf ball comprising a core, an inner cover layer, and an outer cover layer. The coefficient of restitution of the core is 0.770 and the coefficient of restitution of the core and inner cover layer is 0.800 or more. Applicant's COR, 0.770 or more, for the ball is an inherent feature of Nesbitt. Nesbitt further disclose the inner cover layer is made from a hard, highly flexural modulus resinous material such as Surlyn 1605 (ionomer), which has a Shore D hardness of 62 (see Yabuki 6,359,066 col 11). The outer cover layer is made from a soft, low flexural modulus resinous material such as Surlyn 1855 (ionomer), which has a Shore D hardness of 55 (see Yabuki 6,359,066 col 11). The spin factor, COR, and PGA compression are considered obvious over Nesbitt since the materials are the same,.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13, 19, 20, 23, 24, 27, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nesbitt in view of Isaac (3,989,568). Nesbitt discloses the invention as shown above but fails to disclose a polyurethane outer cover. Isaac teaches a polyurethane cover. One skilled in the art would substitute the polyurethane cover of Isaac in the golf ball of Nesbitt to obtain a golf ball with good click and feel (Isaac col. 1, lines 15-30).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 10-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-42 of U.S. Patent No. 6,213,894. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the '894 patent claims golf balls comprising a core an inner cover layer made from an ionomer and a cover layer made from an ionomer or polyurethane. Rearranging the limitations does not render a patentable distinction.
